SUSTAINABILITY FOR **GREENER** CONSTRUCTION

WHO WE ARE

NOVAPLAK was established in 1996 when its first pilot plant was built in Coquelles, near Calais France.

NOVAFLOOR is the developer of a unique technology which recycles raw material (including plastic and minerals) to produce new building material. This innovative technology manufactures a wide range of construction material with very distinctive specifications. Due to its recyclability, durability, beauty, severe conditions resistance and sustainability, experts are considering NOVAPLAK the material of the 21st century.

PRODUCT SPECIFICATIONS:

- NOVAPLAK products are built to resist severe conditions.
- Fire retardant with m1 rating
- Salt water resistant
- Excellent anti-slippery grip
- Chemical resistant
- Water proof
- 100% recycled
- 100% recyclable
- Anti-bacterial - anti-fungal
- Very low VOC
- Sound reducing
- Maintenance free
- Thermo formable for more practicality in fixing
- Genuine beauty with special identity
- Paintable
- Extremely durable
- Special sizes : up to 3200 mm X 1200 mm

Outdoor flooring and decking
Outdoor cladding
Prefab houses facing
Formwork faire face skin as a substitute of plywood but 10 times more usable
Textured formwork skin in any shape thanks the Thermoforming ability of the product
Outdoor furniture
Swimming pool decoration
Roofing
Garbage bins
Columns covering
Pergolas
Bangaloes
K9 shelters
Landscape accessories

**RECYCLED &
RECYCLABLE**

NOVAPLAK FORMWORK

NOVAPLAK is a multi-use fire rated M1 formwork sheet for architectural concrete. A durable Plywood substitute, NOVAPLAK does not need a release agent and requires no special tools to be cut and shaped. It is a time efficient solution as it is easily removed from the mold and offers the possibility of texturing the concrete surface simultaneously. Moreover, it is highly scratch resistant and economical: it can be re-used multiple times without being damaged by wet concrete. The sheets can be directly molded into

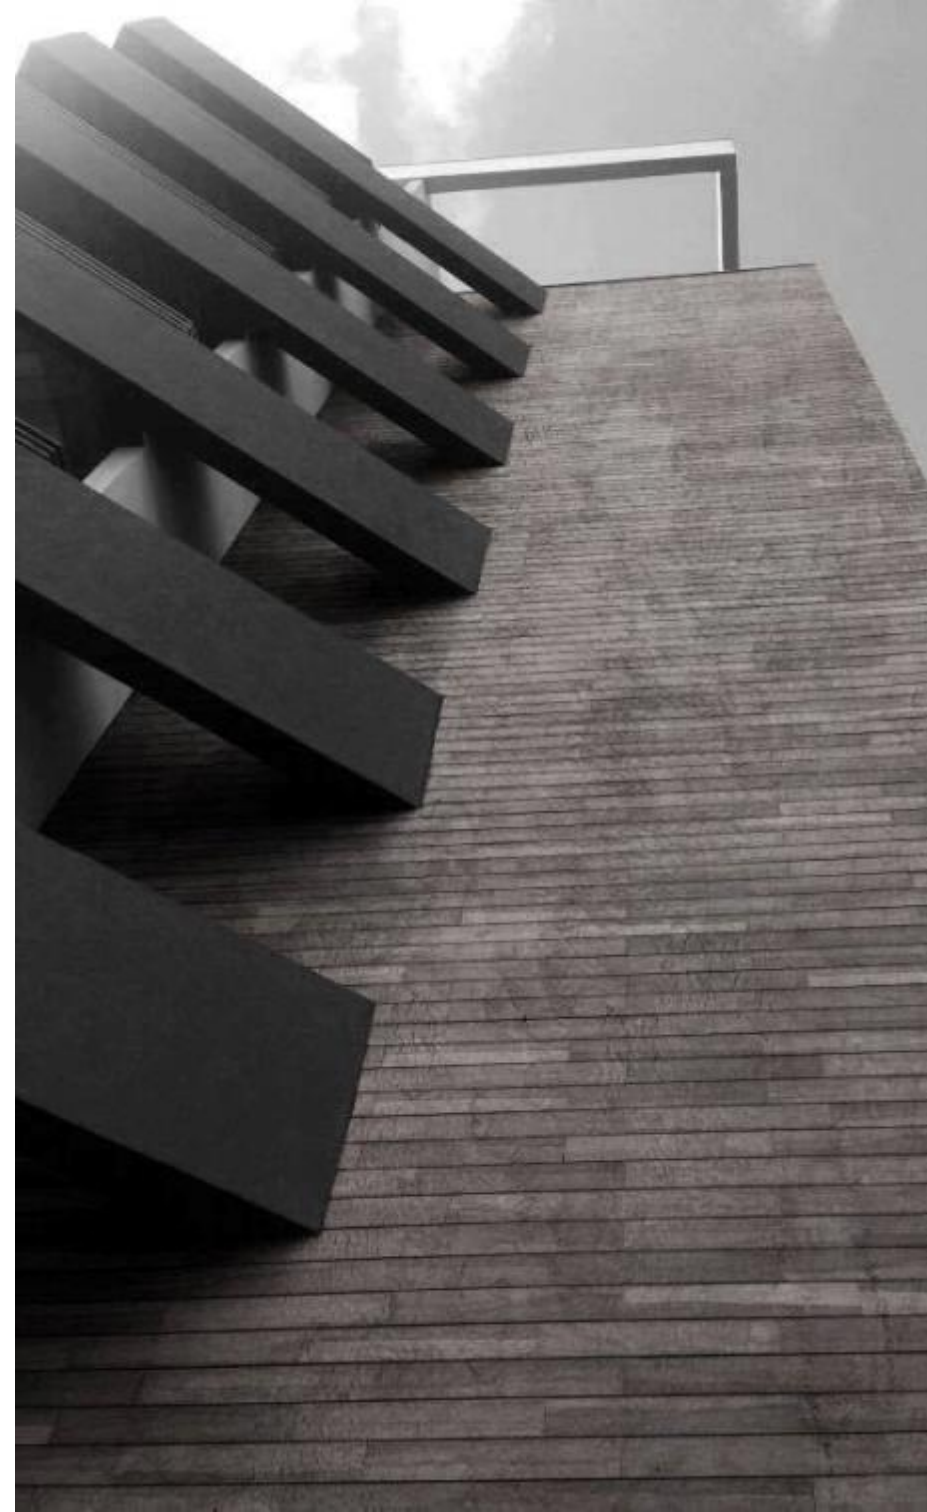

NOVAPLAK CLADDING

With a smooth or structured appearance offers multiple textures, for Exterior/ Interior cladding. The product is rot-proof, highly resistant, chemically inert, easy to clean, impact resistant, easy to machine with woodworking tools, dyed, lacquered on the surface with special PVC paints or painted with acrylic paints commonly used in construction.

NOVAPLAK FLOORING

The NOVAPLAK range presents a wide collection of colors, and textures aimed at creating beautiful yet practical flooring solutions. NOVAPLAK sheets can be grooved and cut to size to suit all needs, lending itself to creative vision and design.

NOVAPLAK sheets, in wide collection of colors and textures, can be grooved, cut to shapes and sizes to suit all needs for creative looks and design.

Ideal for all flooring in humid areas, NOVAMARINE is flexible and easy to install. It is a range of high performing products that offers more comfort when used. It is water and moisture-proof, non-inflating and non-slipping.

It combines the advantages of being lightweight and offering a wide range of colors in order to meet the optimum customer's requirements. Kids playing the fool on a wet, anti-slip NOVAMARINE pool deck surface, is of no special concern.

This is not a beach sand but a NOVAPLAK anti-slippery panel

NOVAPLAK Housing

From 1 m² to 150 m²

Build your sandwich panel unit the way you want and leave the beauty making to NOVAPLAK
